

# EXCIPIENTS

Summit Pharmaceuticals Europe

## **PLASTIBASE**

- A hydrocarbon gel used for making creams and ointments with especially stable viscosity with temperature

## **DMSO**

- A solvent also used for making creams and ointments which enhances permeation

## **CYCLODEXTRIN DERIVATIVES**

- Especially used for drug delivery and solubilization of poorly soluble APIs. Used for oral and injectables

## **SODIUM STEARYL FUMARATE**

- Lubricating agents for making tablets

## **FLORITE**

- It's a special porous calcium silicate which can be used to protect APIs from light or to make solid formulations from liquid APIs

## **MAGNESIUM STEARATE**

- Palm oil free

**S P E**

Summit Pharmaceuticals Europe
